

I would like to say that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Since the Indiana's Telephone Privacy law went into effect I don't mind answering the telephone when it rings now!

I used to receive alot of calls per

week and at all hours of the night, since the act went into effect I think I have only received one or two.

I really feel that we have gained our private life back without all the unwanted telephone calls.

Thank You
